## About This Game

The 58th year of Shouwa, early summer.  
It's June, and the summer heat has arrived earlier than it does most years.  
By day there are crickets, and by night there are cicadas.

We're in Hinamizawa, a small village in the countryside.  
There are fewer than two thousand people here. But every year, there is an event.

This event is a mysterious death.

On a certain day in June, someone dies, and someone else goes missing.  
The series of deaths is connected to the upheaval surrounding the dam construction project.  
A murder case that was covered up is being reenacted.  
Is it a conspiracy? A coincidence? Or perhaps a curse?

Someone who was supposed to be there isn't.  
Someone who wasn't supposed to be there is.

Someone who was alive last night is dead now.  
And someone who is here right now isn't alive.

So, there is no way to avert tragedy. There is no choice but to give up.

**But don't give up.**

Only you can stand up to this.

lovely jubbly :)

. you can not see the airplanes bad game have had to ask for a refund. Your character gets tired after throwing a combo. Not you, you can be perfectly fit, that's fine. Your character, in the game, the game you bought to punch virtual people, gets tired on his own, independently from whether you're on the brink of fainting or still fresh and wanting for more. You then have to wait several second and try blocking before your punches have any effect. This, is a boxing game, where throwing punches is kinda sorta maybe the priority.

I'll bother writing a complete review when this frustrating feature is gone.

Meanwhile, I'm going back to The Thrill of The Fight.. Horrible game, terrible graphics would not recommend. Punch Bomb is a gem.

It's polished. It's fun. It's a legitimate physical workout. It's skill-based with a skill ceiling. It's awesome.

Burn some calories while having fun and grab it. It's a steal at \$7.. A bit easy, short. But well executed, pretty, and good enough for such a small price.. Once again a redundant "lets time jumps" addon. I wished better from wakanda.. WAY too simplistic for my taste. Sorta reminds me of The Polynomial

the music sucks and is on a endless loop

the menus are \u2665\u2665\u2665\u2665ed up, scrolling is sooo slow and the entire interface is weird

Best thing is the graphics

The price is very low, and it should be. But even then i say skip this, there are far better arcade games out there. Great games pack with all the working source code available for each, you just have to look for it. They are mostly well documented and some include documents with fully detailed explanations a must for the learner. Even knowing the basic rules of rugby league I found Rugby League Live 3 quite difficult to get used to. After much frustration and getting constantly beat to nil on pro difficulty by the cpu I nearly gave up. But I didn't, and now I can say that this game is awesome. If you are struggling I really recomend you stick at it and try to improve yourself at the game because once you do the you will end up playing some really competitive matches against the cpu. If you're tempted to buy this game do it now.
