[Vicidial Manager Manual Pdf](#)

Just a reminder that the database on the Database Server is now in charge, all other data and all items controlled by that data have just been forgotten. We now return you to your regularly scheduled programming.

Sanity Test – If these do not match, stop and determine why!

```
screen -list (on the server with VARactive_keepalives => 123456789)
```

```
There are screens on:
    3210.astshell20120918195724   (Detached)
    3313.ASTVDremote     (Detached)
    3322.ASTVDautoFILL    (Detached)
    3215.asterisk  (Detached)
    3316.ASTVDadapt (Detached)
    3310.ASTVDauto (Detached)
    3301.ASTupdate (Detached)
    3304.ASTsend   (Detached)
    3319.ASTfastlog (Detached)
    3307.ASTlisten (Detached)
10 Sockets in /var/run/screens/S-root.
```

```
screen -list (on the server with VARactive keepalives => 123468)
```

```
There are screens on:
    3183.ASTfastlog (Detached)
    3174.ASTlisten (Detached)
    3077.astshell20120918195753    (Detached)
    3177.ASTVDauto (Detached)
    3171.ASTsend   (Detached)
    3082.asterisk  (Detached)
    3168.ASTupdate (Detached)
    3180.ASTVDremote     (Detached)
8 Sockets in /var/run/screens/S-root.
```

Adding new servers to the Cluster in the VICIdial GUI

Log in as the administrator to the VICIdial administration site. Note: Any web server in the cluster is now usable as both Administration and Agent Web. They will all show the same information and can be used interchangeably.

Add A New Server for each server

Do not add a new server for the Database Server, it is already there. Although you may rename it to show it's intended use in your cluster, do not change its IP address.

1. Vicidial -> Admin -> Servers -> Add A New Server
2. Server ID: Name This Server (Must be a unique name, keep it simple)
3. Server Description: Use this to help you identify the server easily in field selection in other areas
4. Server IP Address: Very Important, must be exact using IPv4 xxx.xxx.xxx.xxx notation.
